Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2005 colleges) from your college's score on each benchmark.

2005 CCSSE Benchmark Deciles

All Students

Nashville State Technical Community College

These tables present the range of institutional scores by decile for the five benchmarks of effective educational practice for all participating students. Deciles are percentile scores that divide the frequency of benchmark scores into ten equal groups. Deciles are listed for the entire 2005 participating group of colleges and for each appropriate breakdown according to college size and college urbanicity. A percentile represents the point at or below which a specified percentage of the college benchmark scores fall. For example, the 60th percentile represents the point at or below which 60 percent of the college benchmark scores fall for the respective comparison group. To help you gauge your college's performance relative to the comparison groups, the shaded areas on the national, size, or urbanicity tables indicate the deciles that are less than or equal to your benchmark score.

**Active and Collaborative Learning
Bar Charts and Benchmark Item Composition
All Students**

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

**Active and Collaborative Learning
Bar Charts and Benchmark Item Composition
Enrollment Status Breakout**

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2005 colleges) from your college's score on each benchmark.

2005 CCSSE Benchmark Deciles Credit Hour Status Breakout Nashville State Technical Community College

These tables present the range of institutional scores by decile for the five benchmarks of effective educational practice for both students with 0 to 29 credits and students with 30 or more credits. Deciles are percentile scores that divide the frequency of benchmark scores into ten equal groups. Deciles are listed for the entire 2005 participating group of colleges and for each appropriate breakdown according to college size and college urbanicity. A percentile represents the point at or below which a specified percentage of the college benchmark scores fall. For example, the 60th percentile represents the point at or below which 60 percent of the college benchmark scores fall for the respective comparison group. To help you gauge your college's performance relative to the comparison groups, the shaded areas on the national, size, or urbanicity tables indicate the deciles that are less than or equal to your benchmark score.

**Active and Collaborative Learning
Bar Charts and Benchmark Item Composition
Credit Hour Status Breakout**

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.
