## Accessing Class Climate Surveys

How to access class climate surveys in D2L as well as how to add the class climate external learning to a course

Office of Online Learning

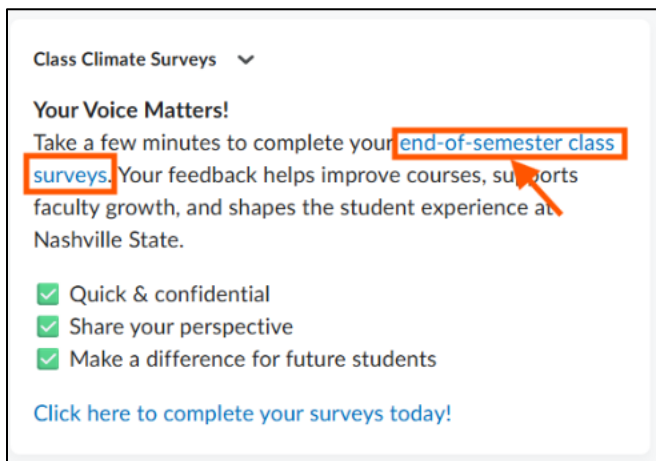

Last Updated 5/1/2026

# Accessing Class Climate Surveys

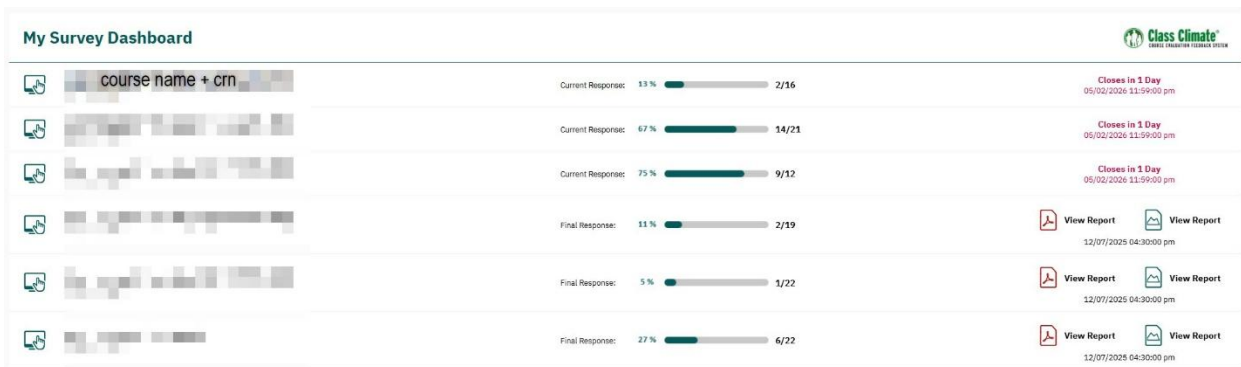

1. Click the “Home” button in your D2L screen to make sure you’re in the right place.

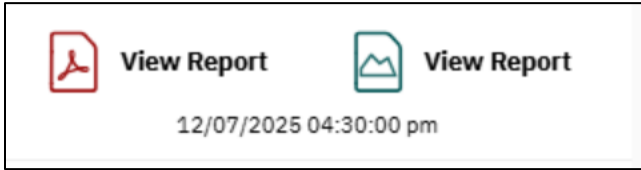

2. Scroll down until you see the Class Climate widget and click the link labeled “end-of-semester class surveys”. There also might be an item posted under “News” with the link while surveys are active.

3. This will show your dashboard. You can see previous reports or current response rates for ongoing surveys.

4. Locate the course for which you would like to download and view the report, then click the icon on the right to download.

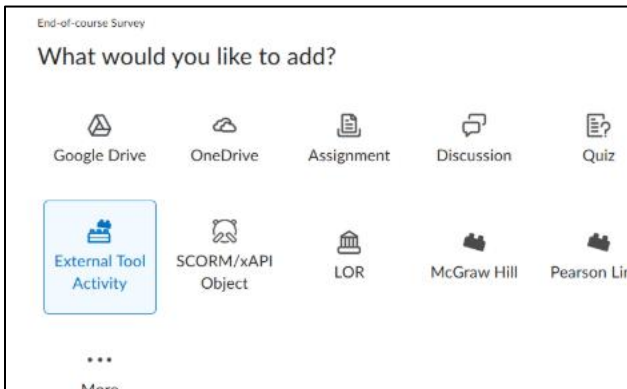

## Adding the Class Climate External Learning Tool to the Course

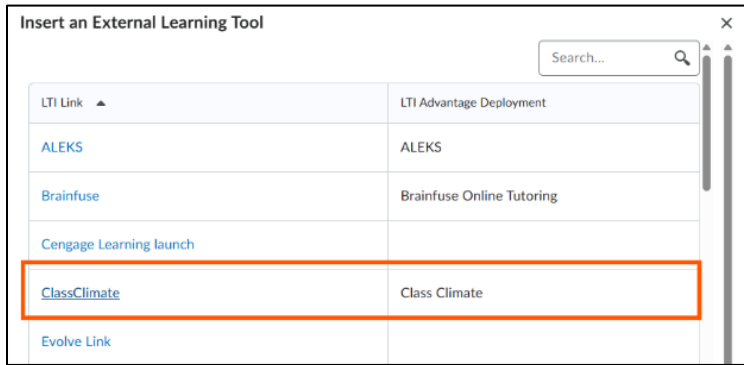

1. From your course content page, add a new unit and name it “End-of-Course Survey”.

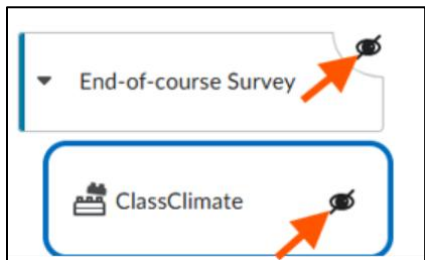

2. Click the “Add Existing” button and select “External Activity Tool”

3. From the menu of options, select “Class Climate”

4. Make the unit visible for students

5. Instructors will see the list of available reports, but students will see their survey dashboard with the links to each course survey.
