## Nashville State Community College

## Edit Accommodations in Classlist

Set Special Access for a student, for all quizzes in a course.

Office of Online Learning

## Edit Accommodations in Classlist

It is possible to set universal Special Access for a student from the Classlist. This allows you to set the student's Special Access accommodation once and have it applied throughout the course.

**Note**: This tool only works for additional time on **Quizzes** or exams, *not* for other accommodations.

1. In the course NavBar, go to **Communication > Classlist.** 

2. Find the student in the list. Select the drop-down arrow next to their name and select **Edit Accommodations.** 

- 3. In the window that opens, check **Modify Time Limit.** Then, choose whether you need to add:
  - **Multiplier of original quiz time:** this multiplies the base time allowed by the number entered. For example, enter **1.5** to have **time and a half** added to the time allowed on all Quizzes in D2L.
  - or **Extra Time**: this setting will add a flat number of minutes to the base time allowed. For example, enter 30 to have an extra 30 minutes added to the time allowed on all Quizzes in D2L.

• 1.5	times	
Extra time		
0	minute(s)	
Save	Cancel	h.

- 4. Select **Save** when finished.
- 5. A small gear icon will appear next to the student's name in Classlist, indicating that the student has accommodations applied.

6. When the student goes to take a quiz, before they start, they will also see this icon. If they hover over it, it will inform them that "Your time limit accommodation is applied." The **Time Allowed** will also list their personal time allowed, with the accommodation applied.
